APC395X STB

APC395X Android 4K STB-CPU 2GHz Quad Core w/ IR extender and remote

DESCRIPTION

The APC395X Android IP Set-Top Box with remote controller is based on up-to-date and efficient ARM hardware architecture that is used today in most embedded devices. The architecture provides many advanced features including graphics acceleration that make user interface very responsive and rich with effects and animation. The STB has a RJ45 socket and Wi-Fi module that allows it to be used, if necessary, as a personal hotspot.
